EXPERIENCE

NEXTBURB - SIX WALLZ INC | DATA ENGINEER

June 2026 – Present | Pune, Maharashtra

- Focused on AI development platforms, AI infrastructure, and AI-powered workflow automation, primarily with Claude Code and Google Antigravity.
- Build and maintain the data platform behind a US real-estate analytics product. Django/PostgreSQL backend services, large-scale property and agent data pipelines covering 5,000+ ZIP codes, and the internal React tools the sales team runs on, including release management and deployment across Azure-hosted environments.
- Boosted database query performance and reduced memory overhead by replacing server-side cursors with primary-key indexed pagination across large-scale datasets (AgentMaster), optimizing write throughput for high-volume listing syncs.
- Architected, optimized high-throughput ETL and scraping pipelines (MLS, Zillow, Redfin) engineered automated backfill workflows, rate-limiting controls, and data deduplication algorithms across brokerages, phone numbers, and agent profiles.

ONEBILL SOFTWARE INDIA | SOFTWARE ENGINEER

August 2023 – November 2024 | Bengaluru, Karnataka

- Built deep expertise across Billing & Revenue Management (BRM), CRM, and Multi-Level Channel Management (MLCM) modules, troubleshooting and resolving client reported issues while driving proactive fixes for recurring defects to improve product reliability.
- Served as a key engineer on the high-priority XOD project, owning client issues end-to-end, presenting product demos to stakeholders, and automating manual workflows through Java utilities, Python scripting, and API integrations.

CODEGNAN DESTINATION | TRAINEE

April 2025 – October 2025 | Vijayawada, Andhra Pradesh

- Completed intensive full-stack training in Core Java, Advanced Java (JDBC, Servlets, JSP), Hibernate, Spring Boot, and MySQL, building end-to-end applications including an MVC-based Hotel Management System and a Spring Boot Hospital Management System using Spring MVC and Spring Data JPA.

PROJECTS

SENTIMENT ANALYSIS PROJECT - GITAM | PROJECT LEAD

Jan 2023 – March 2023 | Visakhapatnam, Andhra Pradesh

- Led a team to classify sentiment in Twitter posts and Amazon reviews, building an NLP pipeline with tokenization, stemming, and stopword removal feeding TF-IDF vectorization into Naive Bayes, Linear SVM, and Logistic Regression models.

EDUCATION

GITAM UNIVERSITY

BACHELOR OF TECHNOLOGY IN
COMPUTER SCIENCE AND
ENGINEERING

Jun 2019 - May 2023 | Vizag, AP

Cum. GPA: 9.0 / 10.0

SKILLS

PROGRAMMING

Java • MySQL • PostgreSQL • XSLT
HTML5 • CSS • Javascript • JDBC
Servlets • JSP • Hibernate • DataJPA
Spring • SpringMVC • SpringBoot
Python • Django • Design Patterns

TECHNOLOGY

Git/Github • Linux • Windows
Eclipse • VS Code • Jupyter
AWS • Excel • Automation
Data analysis • Machine Learning

CERTIFICATIONS

Hackerrank Java
Math in CS
Technical Support Fundamentals

COURSEWORK

UNDERGRADUATE

Object-Oriented Programming
Software Testing Methodologies
Web Application Development
DBMS
Data Structures
Quantum Computing

SOCIETIES

Computer Society of India (CSI)
Association for Computing Machinery (ACM)
